

## Comprehensive SolarWinds Training - Part II Integrating the Orion NPM Modules

### Overview:

This two-day course builds on the Comprehensive SolarWinds Training Part 1 course. It covers all aspects of installing, configuring and using the Orion Modules. The practical sessions provide hands-on experience of setting up the modules and integrating their data into the web console, and the reporting and alerting functions. Throughout the course delegates are helped to interpret the results Orion produces and encouraged to experiment with different configurations to see how they might affect the results.

Upon successful completion of the course exercises the delegate will be awarded a full credit towards course completion.

Completion of Part I and Part II will provide the delegate with all the knowledge required for the end of course proficiency exam.

### Pre-requisites:

1. It is expected that delegates are familiar with basic networking concepts and terminology. Such familiarity can be gained from attendance on a Network Fundamentals course.
2. Comprehensive SolarWinds Training - Part I Orion NPM Essentials

### Elements – Course Content:

<b>Understanding the Orion Database</b>	Backups and Restores Database Design SQL Fundamentals Writing Queries
<b>Application Performance Monitor</b>	Licensing Monitors and Applications Using SNMP, WMI and User Experience Testing to collect performance data Viewing Results Alerts and Reports
<b>NetFlow Traffic Analyzer</b>	Understanding NetFlow and s-Flow.

	Configuring routers as data sources. Viewing and interpreting results
<b>Wireless Monitor</b>	Viewing and interpreting results
<b>IP SLA Manager</b>	VoIP Settings Viewing and interpreting results
<b>IP Address Manager</b>	IP Address Configuration Viewing and Reporting
<b>Enterprise Operations Console</b>	Configuring a consolidated Enterprise Command Centre
<b>Orion Network Configuration Manager</b>	Device Configuration Management Managing Change
